## CUSTOM BRANDING TO MATCH YOUR MARKETING OR ARCHITECTURAL COLORS

Select from a color palate of over 75,000 combinations to unify your company identity or architecture with your branch's remote transaction system.

## MIX AND MATCH FROM A WIDE SELECTION OF EQUIPMENT TO MEET YOUR EXACT NEEDS

Select from a complete package of equipment that meets your needs. Sold and serviced by a trusted network of local professionals.

### CUSTOMER FRIENDLY DESIGN

- The IXT 7000 Series continues to incorporate SSE's innovative "cut-away corner," which facilitates easy access of the carrier by the customer. Side-opening (standard) and end-opening carriers (optional) are available.
- Standard mounting base or optional 8" base allow you to position the customer unit at the optimal height to service the type of vehicles most often used by your customers. It also allows you to use different height units for different lanes while maintaining the same customer interface.
- Dual high/low stainless steel customer control buttons (Send and Call) make the system easy to use by customers in a wide range of vehicles

### EASY TO SERVICE

- Completely serviceable from the front and sides eliminates the need for unnecessary lane obstruction by service personnel
- Blowers are located in the customer unit, which lowers installation cost and eliminates the need for canopy access

### TUBE CONFIGURATIONS

- Available in Upsend and Downsend, 4" and 4 ½" configurations
- PVC and Steel tubing available to complete a package designed to meet your unique site requirements

### COMPACT FOOTPRINT

- Installs easily on islands as narrow as 24"

### ENVIRONMENTALLY FRIENDLY

- All construction materials used in customer and teller units are RoHS compliant – details available upon request
- All painted surfaces are powder coated, releasing no VOCs during manufacture

Optional fully integrated video with motorized tube

t control on lane camera.

### CUSTOM COLORS

The IXT 7000 Series Customer Units can be customized to match brand or architectural colors: Select a color for the base unit and another color for the two accent panels.\*

The base unit panel comes with a standard powder coated black exterior. The audio/video panel and lower accent panel come with stainless steel as shown on the front cover.

\*Over 75,000 color combinations

### ENGINEERED FOR PERFORMANCE

- Patented high performance “PowerTwin” Turbine and “Smart Relay” technology provide increased customer throughput and extended turbine life
- The integrated soft landing feature extends carrier life as well as reduces system wear and tear
- Night lock feature

### TELLER UNITS

The IXT 7000 offers maximum installation versatility as it can be used with any of the five standard IXT family of Teller Units.

### INTERCOM SYSTEMS

SSE intercom systems are engineered to be flexible, scalable and provide clear, high quality audio and video communication between the teller and customer, even in the most challenging sound environments. Small console footprint requires minimal counter space and adapts easily with video applications.

Also shown is the optional wireless headset.*

**Security Systems Equipment**

## *Expand, Upgrade and Maintain Your Security Equipment Systems Today and Tomorrow*

At SSE you define the best solution to meet your needs. We'll deliver the combination of equipment and systems that enable you to efficiently and economically meet those needs. From IXT Remote Transaction Systems to Gold Series Vault Doors, our physical security equipment product lines are designed to easily upgrade to the latest technology.

Unify your brand and corporate colors into the IXT 7000 Remote Transaction System or color the equipment systems to match your building's architectural palette or community standards. Drive-up units, teller drawers and window exteriors can be painted in thousands of powder-coat color combination options.

Upgrading to the IXT 5000 Remote Transaction System couldn't be easier with this low-voltage, drop-in replacement unit, optional fully integrated one or two-way color video system and 4" or 4 1/2" tubing.

IXT Walk-Up Customer Units are a dream to install because they mount directly to the front of a wall, increasing your installation options and eliminating the need for access behind the wall. Matching the Walk-Up Customer Unit to your interior design is simple with the wide pallet of color options available.

Your SSE Authorized Dealer is available to help you design, plan and complete any size project.
